| UK Host Unit; | King's College Hospital, NHS, Denmark Hill, London |
| Supervising Consultant | Mr. Bassel Zebian |
| Starting date | May 27 th 2025 |
| Duration of attachment | 6 weeks |
| Trainee Report: 100-150 words | <p>I am deeply grateful to the SBNS Bursary for granting me the opportunity to undertake a six-week clinical observership at King's College Hospital, London. This invaluable experience significantly enriched my professional development and provided a deeper understanding of the UK healthcare system.</p> <p>During the observership, I had the opportunity to observe a wide range of advanced paediatric and adult neurosurgical procedures, including complex cranial, fetoscopic surgery, neuro-oncosurgery, cerebrovascular and spinal surgeries. I also actively participated in outpatient clinics, morning handovers, multidisciplinary meetings, telephone follow-ups, pre-operative planning discussions, and neurosurgical research activities. These experiences broadened my clinical knowledge and enhanced my skills in patient evaluation and management.</p> <p>I would like to express my sincere gratitude to the entire neurosurgery team at King's College Hospital—particularly Mr. Bassel Zebain—for their mentorship and support throughout this period. This observership has been a significant milestone in my neurosurgical training and has further strengthened my dedication to the field. The knowledge and skills I have gained will be invaluable as I return to Nepal, where I am committed to serving my patients with greater competence and confidence.</p> |
