

Neuroradiology Workshop for Neurosurgeons

10th and 11th November 2026 | RCSEd - Edinburgh | 12 Hours CPD | From £450

8th Neuroradiology Workshop for Neurosurgeons

This 2 day course is an interactive, case-based set of workshops of neuroradiological imaging. Each delegate is provided with a radiology workstation which contains a database of imaging viewed on a software that simulates how a clinician would view images at work.

Each workshop is jointly taught by a Neuroradiologist and Neurosurgeon with discussion centered around the interpretation and diagnosis of neuroradiological pathology, core to neurosurgery followed by correlation of the imaging to the neurosurgical approach.

During the workshops, there will be teaching on the application of the different types of imaging modalities and basic applied physics to enhance the learning experience and understanding. Learning points will be reinforced with bite size presentations during the sessions. There is no didactic lecture based teaching.

Suitability: Neurosurgical Trainees ST1-ST6

Relevant Grades: ST1, ST2, ST3, ST4, ST5, ST6

Course Format: Computer-based workshop

Course Directors

Dr Ahmed Iqbal – Consultant Neuroradiologist

Dr Robin Joseph – Consultant Neuroradiologist

Mr Jerome St George – Consultant Neurosurgeon
