Welcome Letter

We are pleased to welcome you to Marseille for the third Annual Brain Metastases Research and Emerging Therapy Conference. Last year's successful edition has prompted us to once again organize this conference. Over the past several months, the EORTC has launched the development of a Brain Metastasis platform, created in August 2012, in order to optimally develop and conduct projects focusing on brain metastases.

This research platform brings together the multidisciplinary approach that is needed to develop brain metastases projects across several tumor types and disciplines such as breast cancer, lung cancer, melanoma, imaging, pathobiology and radiation oncology. It is expected that this cross-sectional platform stimulates innovative and insightful research in a collaborative environment in order to improve the standard of care and methodology of clinical research.

Together, the EORTC, GRPCMac and Canceropole PACA have decided to jointly organize the "Annual Brain Metastases Research and Emerging Therapy Conference" **which will be held under the auspices of the EORTC.** The organizing committee hopes that this meeting will provide an exceptional opportunity for you to share your collective expertise ranging from basic science to new treatments in order to facilitate ongoing studies and lay the foundation for future collaborative projects.
